

## **PRESIDENT'S REPORT TO BOARD OF TRUSTEES**

### **JUNE BOARD MEETING**

#### **COVID-19**

I have included in this report all the previous Board reports submitted since our last Board meeting to have a record in the minutes. I appointed a Re Open Committee to address how SWTJC would reopen our campuses for the Fall Semester. They have been busy evaluating proposals and making sure we comply with recommended checklists from the state for the various aspects of our college. We have a proposed plan, however, the state advised us that a community college re open checklist would be published by Friday, June 12. We have decided to wait and verify that we have addressed all items on the checklist before we move forward. It is our intent to bring our proposed re open plan to the board meeting on June 18.

#### **Roof Damage Due to Hailstorm**

We had significant roof damage to our roofs in the Del Rio Campus to extent of approximately \$500,000, it was covered under our insurance policy and have received payment on the damages. Our staff has gone out for bids, utilizing the same State Procurement process that was used for the Uvalde roof repair. We have not received the bids back, but we anticipate having them in time for the board meeting.

#### **Roof Repairs Uvalde**

The roofing contractor has finished the roof repairs on the Wagner Building and anticipates finishing the Garner Science Building early next week.

#### **MOU**

We have included the revisions to our Dual Credit and Early College High School MOU for Board approval. In addition, we have included the MOU with UTSA Winter Garden Coop which provides access to doctoral level courses to the residents of the Middle Rio Grande Region. Our only significant outlay for this program is providing a classroom for use on the weekends and does not interfere with regular course offerings.
